Uritron 30's

£14.29

Body fluid balancing and urinary tract maintenance

The Urinary System is the system of organs that produces and excretes urine containing unwanted wastes, excess water, salts, and nitrogen compounds. Excessive or inadequate production of urine may indicate illness, for example, the presence of glucose or blood cells in the urine. Uritron provides nutritional support for the urinary system. Supplementation with Uritron tablets will help keep the tract healthy whilst also maintaining body fluid balance.

- Bladder Infection
- Candidiasis
- Gout
- Incontinence
- Kidney Health
