

Crossgates Farm

Crossgates Farm Ltd

Calcitone (30's & 60's)

£12.99

Calcium for bone density

Adequate Calcium intake throughout one's life & particularly during the developmental years is important, as once bone density is lost, it cannot be replaced. Calcitone provides calcium combined with other nutrients for enhanced absorption. It is suitable for children and adults and is a highly recommended supplement because of the synergistic combination of essential nutrients in a form which is well absorbed and utilised by the body.

Everyone needs a good source of calcium. Because of poor food choices, dairy products alone do not provide us with adequate amounts for the correct functioning of:

- Bones
- Immune system
- Nerves
- Muscles
- Electrolytes
- Blood
